

East Toronto Health Partners

Statement of Support for WoodGreen Community Services' 540 Cedarvale Housing Project

East Toronto Health Partners (ETHP), the Ontario Health Team (OHT) serving East Toronto, strongly supports the development of integrated programs and services that help local residents more easily find and get the care they need close to home.

We understand the importance of collaborating across partners and sectors and are dedicated to working together to improve the health of our communities.

To that end, we are pleased to support WoodGreen Community Services' new modular housing project at 540 Cedarvale Ave., which will provide much needed supportive housing for vulnerable seniors in East Toronto.

Housing is a key social determinant of health, the lack of which has the ability to negatively impact someone's health and well-being, especially among seniors with complex needs.

We recognize WoodGreen offers several comprehensive programs that help address poverty and promote community health in different populations, including seniors. We are confident they will bring their full range of services and expertise to 540 Cedarvale to support vulnerable seniors in our community.

We look forward to collaborating with WoodGreen on this important new project to help improve the health and wellness of seniors in need.

Sincerely,

Jason Altenberg
