

ABOUT THE PROGRAM

- The Building Code Skills Development Program for Internationally Trained Individuals a skills-training initiative that prepares participants for the role of Building Official with the construction and public administration sectors. Participants will learn:
 - Building Code legislation and regulations
 - Principles of building science and how they affect the performance of various materials, construction types, building designs, and mechanical systems
 - Technical communication skills and electronic communication processes used by the construction industry
 - Reading and interpreting construction drawings and an understanding of how drawings must be prepared for building permit applications
- Program content has been created in collaboration with the Ontario Building Officials Association (OBOA) and George Brown College's Continuing Education Technology and Trades Department
- Most courses provide graduates with Continuing Education credits which may be transferable to post-secondary or Continuing Education construction and engineering technologies programs

THIS PROGRAM WILL PROVIDE YOU WITH

- Ontario Continuing Education credits
- Graduates will be eligible for the OBOA Building Code Qualified (BCQ) certification after completing this certificate and the Building Code Identification Number (BCIN) exams for House 2012 and General Legal/Process 2012
- Graduates will be eligible for a one-year student membership with the OBOA
- Guidance & information on educational and career pathways
